Ukraine Girls: The Best Turn Ons

Cheryl Weisz | July 2, 2013 | Ukrainian Women | girls of ukraine, ukraine girls, ukraine girls photo

If you're still waiting for your sex life to move forward or you're in that phase where you're stuck with the same styles with [Ukraine girls](#), don't worry; the best turn ons can help enliven things in the boudoir.

If you are stressed out, and you'd rather not delve into some bedroom action, a change in your routine or a new scenery may actually do the trick.

A little work and a bit of creative thought can do you good, so check out these playful ideas that can help spice up things between the sheets with [Ukraine girls](#).

Horny Hide and Seek

Stay or be home early so you can have enough time to

prepare.

Control all possible distractions such as mobile phones, the house phone, or your pets. Turn off your mobile phone, unplug the house phone, and arrange for someone to take care of your pets. The house must be completely silent and appear empty.

Turn off all the lights and use candles to light the path that would lead to where you are.

Shower and get naked, leaving a trail of your clothes from the door to you. Don't use dirty clothes that when smelled would turn her off, instead of on.

When she gets home, she would eventually find you bare naked, waiting for her patiently; and the anticipation would actually turn you both on.

Bold Matching Pairs

Prepare two containers and several strips of paper.

In one container, put strips of paper with action words written on each, such as kiss, lick, nibble, suck, and touch.

In the other container, place strips of paper with a body part written on each, such as breasts, butt cheeks, clitoris, ears, eyes, feet, forehead, lips, mouth, neck, nose, penis, and thighs.

Take turns in taking one paper from each container, and perform what you draw on each other. Don't say out loud what you got so the other would be thrilled with excitement.

This activity will help you discover new ways to please and touch each other that you may not have had the boldness to attempt.

Do the Unexpected

Scheduling when to have sex can barely be considered a big turn-on.

Furthermore, in long-term relationships, couples, at times, stop doing all the enjoyable things they used to do when they first began dating, such as sneaking off into darkened corners to make out, with complete disregard to the people who can see them.

Bring that ardor back and think no more of squeezing lovemaking into your schedule. Surprise her with a quick tryst, and it's unlikely that she would be objecting.

Sneak up on her with a quickie the next time you're supposed to see her.

If you're living in together, wake up 30 minutes early and start your day with a sexual activity.

It could be just as explosive and satisfying if you are unprepared and you know that you only have a few minutes to fool around.

Phone Sex and/or Sexting

Through call or text, start off lightly by informing her what you are wearing, then get more playfully serious by describing to her what you would want her to do to you; and above all, what you are dying to do to her the next time you meet.

You will be astonished at how explicit and open you could get, and you may even find yourself making use of words that are not in your usual vocabulary.
